# Top coat spray guns for perfect finishes

SATA high performance spray guns are used to achieve perfect finishes in industrial coating processes, whether it be hand-held gravity cup spray guns, material fed spray guns or automatic spray guns. Their nozzle systems are perfectly adapted to the modern paint systems of all leading paint manufacturers. This ensures finishes which meet the highest demands in regard to color match precision, effects, material distribution, gloss level and brilliance.

Hand-held SATA high performance spray guns are made of forged aluminum and finished with a high-quality finish. With their fluid tips and paint needles being made of stainless steel, they can be used for the application of both solvent-based and waterborne paints. Round/flat fan control and air micrometer are standard features. The gun handle as well as all control elements are ergonomically formed for perfect gun control.
